Standards Mastery Results by Test (District/School):
A detailed view of how students are performing on recently assessed grade-level standards.

Use for:
- Tracking student progress in mastering recently taught standards
- Planning ongoing instruction and reteaching to accelerate student growth

When:
- After the completed administration of Standards Mastery assessments

Related Reports:
- Standards Mastery Results Year-to-Date (District/School): Review performance on all standards assessed throughout the year to track progress against all grade-level standards.

Navigate: Use these dropdowns to quickly navigate to a different subject, population, and Standards Mastery assessment. Once Subject, School, and Grade are selected, the Assessment will automatically default to the most recently assigned assessment for the selected grade level.

Skills Summary:
- Shows performance on each of the standards included in the assessment to help you identify students’ gaps and strengths.

Click the “i” icon to view the full text for a standard.

Performance Distribution:
- Hover over the chart to see the percent of students who are Proficient, Progressing, and Beginning in their mastery of the skills assessed.

Click the “PDF” icon for instructional resources targeting a specific standard.

Assessment Summary:
- When an assessment has multiple skills, this section shows performance for the overall Standards Mastery assessment, including the percent of students who are Proficient, Progressing, and Beginning in their mastery of the skills assessed.

Show Results By:
- Use this dropdown menu to show results by Class or Report Group when viewing results for a School. When viewing “All Schools,” the results table will show results by School only.

To drill down to population data, select the name of the population in Column 1. When a School and Grade is selected at the top of the report, select “View All Students” to see individual students.

Table View Dropdown Menu:
- Use this menu to switch between Skill Summary, Assessment Summary, and By Skill views. If one standard was assessed, the By Skill view will be the only table view available. This menu is currently set to Skill Summary view.

Skill Summary View:
- Average Assessment Score: Shows each subgroup’s average score on the overall assessment
- % of Students Proficient: View subgroup scores on each of the individual skills assessed in the columns labeled with the standard number
- Students Completed/Assigned: Shows how many students have completed the assessment in each subgroup

Understanding i-Ready Report Terminology:
- Proficient = students who scored above 66%
- Progressing = students who scored 33%–66%
- Beginning = students who scored below 33%
6 **Assessment Summary View:** View the average assessment score and overall performance distribution on the assessment by subgroup.

7 View the percent of students in each subgroup who are Proficient, Progressing, and Beginning in their mastery of the skills assessed.

7 **By Skill View:** View the average skill score and performance distribution of the selected skill.

7 **Average Skill Score:** Shows each subgroup’s average score on the skill assessed.
